

# virtual poster showcase

## Research is Meant to Be Shared

## Virtual Poster Showcase Makes it Easy

Students need to take only these three simple steps to gain valuable experience presenting and evaluating their research.

- 1 Submit an abstract**
- 2 Upload a poster and accompanying video presentation**
- 3 Evaluate the posters of peers and receive feedback on their own poster**

Virtual Poster Showcase (VPS) is AGU's new online platform for students to present their research without having to travel.

Presentation of results is an essential career skill to practice and develop, in or out of Earth and space sciences, and VPS is a cost-effective way to accomplish this.
